- Telescoping aluminum mast — strong, light, compact
- Anti-fall safety system + auto-safety kill switch
- DC (battery) or AC (corded) power options

OVERVIEW

The GL-850 is a compact and versatile material lifter designed for vertical and overhead glazing, construction sites, and workshops. With a telescoping aluminum mast reaching 28.5 ft (8.7 m) and a 660 lb (300 kg) load capacity, it folds quickly for single-operator setup and transport. Available in DC (battery) or AC (corded) configurations.
